

a wagering data management facility for providing real-time racing data and for maintaining wagering accounts for users;

5 a racing data interface that receives said real-time racing data from said wagering data management facility;

a source of real-time racing videos of at least one live event;

32
p
Cont. 10 a video and data distribution system for receiving said real-time racing data from said racing data interface and said real-time racing videos from said source of racing videos, said video and data distribution system providing both said real-time racing data and said real-time racing videos;

a user terminal for receiving and separating said real-time racing data and said real-time racing videos; and

a monitor on which said user terminal [simultaneously] displays said real-time racing data and said real-time racing videos.
15

3
B 92. (Amended) The system of claim [69] 91 wherein said means for presenting race results further comprises means for displaying said real-time racing videos on said monitor.

100. (Twice Amended) A method of interactive wagering on live races in real-time using an off-track wagering system, comprising the steps of:

34
B providing racing data with a wagering data management facility;

maintaining a wagering account for a user with said wagering data management

5 facility;

receiving racing data from said wagering data management facility with a racing data interface;

supplying real-time racing videos of at least one live event;

10 receiving both said racing data from said racing data interface and said real-time racing videos with a video and data distribution system;

providing with said video and data distribution system both said racing data and said real-time racing videos;
